Story Idea 1

Linear or Non-Linear?

Non-Linear

If Non-Linear, which format are you using? (Book Ending, The Countdown, The Puzzle, or The Beaded Necklace)

Puzzle

Summarize how your story will fit that format:

My story fits the Non-linear puzzle format because the audience does not know what the main characters are trying to do. The characters will be in a lab setting mixing chemicals and the audience does not know what they are trying to make or why they are making it. There is a big reveal at the end.

CREATIVE BRIEF

What must it be?

A stop-motion animation of my choosing using original materials

Who is it for?

Children interested in science.

How long must it be?

45 to 90 seconds

What is your objective with the piece?

My objective is to pique a child's curiosity with science and make them smile.

When is it due?

The final animation is due on September 25th.

What is the overall idea?

Friends working together to make something great

What is the storyline summary?

Paper-cut out characters are working together on an experiment in a science lab. Their concoction causes an explosion. Once the mess has cleared, the characters are transformed into 3-D.

Elevator pitch:

The Experiment is a quirky animation about two scientists working together on a transformative new element.

Tagline:

Experiment for Success

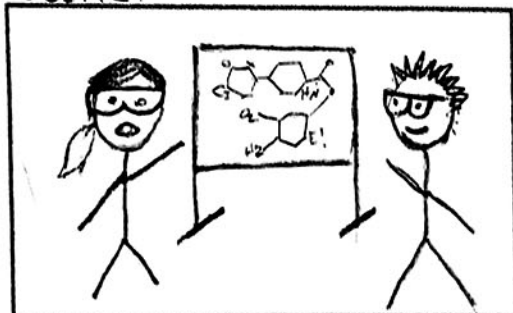

Look and feel description:

The two main characters and the scenery will be made from paper cutouts. The science lab will be white and sterile looking but the potions will be colorful. The 3-D characters will be from existing toys. I expect the lighting to be bright and the music happy.

Identify classic plot. Ex: Good vs Evil / Overcoming the Monster, Rebirth and Redemption, Rags to Riches, Role Reversals, Buddy Stories, Love Stories, Quest / journeys / Voyage and Return, Ship of Fools, The Rebel / Life Against the Grain, Coming of Age, or "Other" (explain):

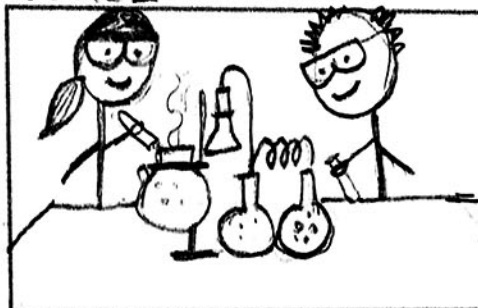

Buddy Stories

Scene 1

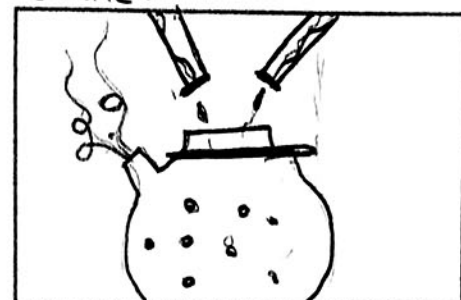

Scientists buddies discuss
plan
(Paper Cut out)

Scene 2
